

Do you support the completion of SR1 as soon as possible? If not, why not?

Are you supportive of acquiring the Springbank land required for SR1, even if that may require expropriation in some instances?

Do you have any concerns that SR1 is not the appropriate first project for the Elbow River, and if so please provide reasons and elaborate if you support an alternative project and why?

Are you supportive of, and will you be an advocate for, ensuring all upstream mitigation projects required to fully protect Calgary from flooding on the Bow River are pursued with urgency? If not – why not?

Do you support continuation of the Alberta Community Resilience Program (ACRP) and the Watershed Resiliency and Restoration Program (WRRP)?

Calgary-Elbow

Janet Eremenko

Do you support continuation of the Alberta Community Resilience Program (ACRP) and the Watershed Resiliency and Restoration Program (WRRP)?

Calgary-Elbow	Doug Schweitzer	Yes. It is incredibly disappointing that four years after SR1 was first approved we are hardly any closer to protecting Calgary from another flood. A United Conservative government is committed to moving SR1 forward and expediting construction once the requisite approvals are obtained. We need this critical infrastructure to protect Calgary.	Yes. If necessary, our party is committed to expropriation of land required to expedite construction of SR1.	No. A United Conservative government would be fully supportive of the SR1 project for the Elbow River.	Yes. I am supportive and will be an advocate for necessary upstream flood mitigation projects to protect Calgary.	It is diligent of any incoming government to review programs implemented by its predecessor. A United Conservative government has no reason to think that these programs in particular should not continue.
Calgary-Shaw	Rebecca Schulz	Jason Kenney will support projects that protect all Albertans	I believe in Jason Kenney's vision of saving money and this is the best project to protecting Albertans		With the UCP and Jason Kenney, we will support your project	I wasn't here for the flood, I am confident Jason Kenney and the UCP will work to protect Albertan's from future tragedies

Do you support continuation of the Alberta Community Resilience Program (ACRP) and the Watershed Resiliency and Restoration Program (WRRP)?

Calgary-Buffalo	Omar Masood	Yes.	Support for Springbank land acquisition. Will need to ensure full compensation has been provided for proposed land acquisition.	SR1 has my full support.	Yes I will be an advocate. We cannot afford another disruption like the 2013 floods.	Yes I do.
Calgary-Currie	Lindsay Luhnau	Please refer to the Alberta Party's response				
Calgary-Peigan	Ronald Reinhold	Yes	Yes, it is necessary	No this is the correct project	As urgent as we can be in the current downturn of the economy	Yes
Calgary-Shaw	Bronson Ha	The construction of SR1 is much-needed to protect Calgary from flooding. As an evacuee and former worker in helping with the flood while experiencing the disaster with fellow Albertans, I strongly support the completion of SR1 as soon as possible with the proper safety protocols in place with the project.	Land acquisitions must respect landowner rights and owners should not be forced out of their property. I will support the acquisitions if the land transfer was fairly dealt with and nothing was forced. People come first and all good things take time.	Not constructing two dams in favour of cost efficiency puts Alberta's communities in the risk long term. It has been said that SR1 will not fully cap high stream waters and the McLean Dry Dam was more effective. A dry dam would reduce the flood effect more and having both would create a contingent back up system.	I will support and advocate for flood protection as it is important to protect our current communities for today and ensuring we have a city for future generations - safe and flood free. This is a critical need to protect the people of Calgary and our infrastructure as a whole.	Absolutely!
Calgary-South East	Rick Fraser	Yes. Full support the completion as soon as possible.	It's hard to know the complete file and properties being referred to. My hope is that we can come to an agreement and settlement with those properties involved. Public safety is paramount.	The consensus by government officials and professionals who deal with these projects feel that this is the best project and I would not have the expertise to speak against those.	Yes. Fully support mitigation projects that protect lives. Whoever forms government should always prioritize public safety.	Yes.
Brooks-Medicine Hat	James Black	Yes.	Yes.	No.	I live in Medicine Hat anything that is done upstream is a potential benefit to us. We have been building berms for the last five years to prevent another 2013.	Yes.
